Resource 7 — Unexpected Developments

Teacher Reference | Lesson 3

1. Industrial Contamination

The site contains contaminated soil. Cleaning it up will use a large portion of the redevelopment budget.

What will you sacrifice to make the site safe?

2. Private Investment

An investor offers to fund a hotel and create 200 jobs, but wants exclusive access to part of the waterfront.

Is the investment worth restricting public access?

3. Industrial Heritage

An old railway workshop has historical significance. Preserving it will cost more than demolishing it.

Should the building be saved, and what could it become?

Final discussion:

How has your original plan changed, and which stakeholders had to compromise?

Scenarios are fictional, inspired by historical redevelopment issues in Honeysuckle.
