WORK / PLACE

How has the changing nature of work shaped Honeysuckle, and where might it be heading next?

NAME: _____

CLASS: _____

Honeysuckle: Then, Now & Next

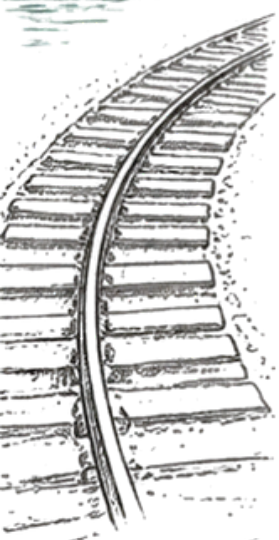

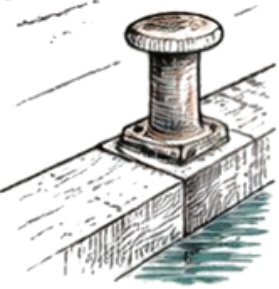

01 WHAT WORK LOOKS LIKE → **02** WHY WORK MATTERS → **03** WHO SHAPES CHANGE → FIELDWORK: WHAT HAS CHANGED, AND WHAT HAPPENS NEXT?

01 / CHANGES IN HONEYSUCKLE

Look closely. Find visible evidence of industrial history, changing land use and contemporary activity. Record what you can actually see before explaining what it might reveal about work.

Do not treat an old-looking surface as proof of a particular date. Describe the evidence first.

	FEATURE	WHERE I FOUND IT	WHAT I CAN SEE	WHAT IT MIGHT REVEAL ABOUT WORK
1	Older industrial buildings or architectural details			
2	Evidence of former transport, storage or waterfront goods handling			
3	Contemporary commercial buildings or workplaces			
4	Modern public or recreational spaces			
5	Signs of redevelopment or changing land use			

FIELD SKETCH / add arrows, labels and one question

Choose one feature. How might it connect Honeysuckle's past with its present?

02 / WORKPLACE SPOTTING

ACTIVITY 02 /
OBSERVE + INFER

Identify workplaces or work-related activity you can see around Honesuckle. Separate evidence from inference: an observation is what is visible; an inference is a reasonable idea about what it could mean.

Workplace / Industry	What I observed	Possible occupations	What I infer
1  WAREHOUSE / LOGISTICS			
2  CAFE / HOSPITALITY			
3  OFFICE / PROFESSIONAL SERVICES			
4  PUBLIC SPACE / COMMUNITY SERVICES			
5  TRANSPORT / MOBILITY			

WORK THEN / WORK NOW

What kind of work may have happened here historically?

How is the setting different today?

WORK ARRANGEMENTS: HANDLE WITH CARE

You may be able to notice a workplace setting, but you cannot confirm arrangements such as casual, permanent, remote or hybrid work just by looking.

If you suggest one, label it as an inference and explain why.

One difference between historical and contemporary work in this place is...

03 / WHO BENEFITS FROM THE WATERFRONT?

Investigate how Honesuckle is used now. Think about different people and groups, what they need, and where their priorities might overlap or conflict.

WORKERS

What matters to them?

What evidence did I notice?

RESIDENTS

What matters to them?

What evidence did I notice?

BUSINESSES

What matters to them?

What evidence did I notice?

VISITORS

What matters to them?

What evidence did I notice?

PUBLIC / GOVERNMENT STAKEHOLDERS

What matters to them?

What evidence did I notice?

ENVIRONMENT + HERITAGE ADVOCATES

What matters to them?

What evidence did I notice?

EVIDENCE I NOTICED

PUBLIC ACCESS	BUSINESS ACTIVITY	EMPLOYMENT	COMMUNITY SPACE	INDUSTRIAL HERITAGE	ENVIRONMENT
☐	☐	☐	☐	☐	☐

A TENSION TO THINK ABOUT

Which two priorities could conflict?

What compromise could be reasonable?

My compromises would be...

because...

04 / THEN, NOW + NEXT

Draw what you can see today. Add labels that distinguish historical knowledge, field observations and predictions.

FIELD SKETCH / Honeysuckle today

- historical industrial use
- contemporary workplace or land use
- public or community activity
- possible future change

THEN – →
What was this area previously used for?

NOW – →
What evidence of current work and land use can you observe?

NEXT –
How might this area continue to change?

H = historical knowledge | **O = observation** | **P = prediction**

A prediction is not a fact. Explain what evidence led you there.

05 / FUTURE HONEYSUCKLE CHALLENGE

Propose one change that could help Honeysuckle respond to future employment or community needs. Use your fieldwork evidence, not just a personal preference.

DRAW YOUR IDEA

WHAT I WOULD INTRODUCE OR CHANGE

OCCUPATIONS OR INDUSTRIES IT COULD SUPPORT

HOW WORK ARRANGEMENTS MIGHT DEVELOP

WHO WOULD BENEFIT?

WHO MIGHT HAVE CONCERNS?

POSSIBLE DISADVANTAGES OR TRADE-OFFS

FIELDWORK EVIDENCE THAT SUPPORTS MY DECISION

How does my proposal answer the inquiry question:

How has the changing nature of work shaped Honeysuckle, and where might it be heading next?
